COUNTRY Hungary CONFIDENTIAL, DATE DISTR. 11 MAY SUBJECT Hungarian Oil Wells NO. OF PAGES 2  PLACE ACQUIRED DATE OF IN SUPPLEMENT TO REPORT NO.  1. The following Hungarian oilfields are located southeast of Lake Balaton:    Name of Field No. of Wells Ho. being exploited	50X1-HUN
PLACE ACQUIRED  DATE OF IN  SUPPLEMENT TO REPORT NO.  THIS IS UNEVALUATED INFORMATION  1. The following Hungarian cilfields are located southeast of Lake Balaton:  Name of Field  Lovassi 145 75  Budafa Puszta 132 64  Hahot 22 1 with salt water  Inke 2 1 with salt water  Inke 2 1 with salt water  Crude cil production in Hungary amounts to 425,000 tons per year. The crude cil production, the proportion* being 1,200:1 of gas to cil.  3. Gasoline is being extracted from gas at two plants:  a. At Lovassi the gas refinery produces fifty tons per day. Ninety to one hundred grams of gasoline is obtained from one cubic meter of gas under pressure of four atmospheres.  b. At Kerettye the gas refinery produces forty tons per day. Ninety to one hundred grams of gasoline is obtained from one cubic meter of gas under pressure of four atmospheres.  4. There is a soot factory at Lovassi where one hundred kilograms of soot ar obtained for the rubber industry by burning 10,000 cubic meters of gas.	
DATE OF IN  SUPPLEMENT TO REPORT NO.  THIS IS UNEVALUATED INFORMATION  1. The following Hungarian cilfields are located southeast of Lake Balaton:  Name of Field No. of Wells Ho. being exploited  Levasti 145 75  Budafa Puszta 182 64  Hishet 22 1 with salt water  Inke 2 1 with salt water  1 with crude cil emilsion.  2. Crude cil production in Hungary amounts to 425,000 tons per year. The crude cil production is gradually declining, with the situaltaneous increase of gas production, the proportions being 1,200:1 of gas to cil.  3. Casoline is being extracted from gas at two plants:  a. At Levasti the gas refinery produces fifty tons per day. Nimety to one hundred grams of gasoline is obtained from one cubic meter of gas under pressure of four atmospheres.  4. There is a soot factory at Levaszi where one hundred kilograms of soot ar obtained for the rubber industry by burning 10,000 cubic meters of gas.	50X1-HU

. 9

- 7. High pressure valves, pipe heads, clutches, and drilling rods are produced by the Manfred Weiss firm of Budapest. The production amounts to 1,200 tons per month, all of which is exported to the USSR.
- 8. "Bentonite" and "Aquagel", necessary for oil well drilling, are produced by three firms:
  - a. Varszeli es Frits, Sarospatak (K 59).
  - b. Magyar Kaolin milvek Rt, Budapest.
  - c. Altalanos Ipari, Budapest.
